JIMIN BYUN

Game & UX Designer · **designs and builds playable systems**

vejimil@snu.ac.kr
jimin-byun.com · github.com/vejimil
Seoul, South Korea

SUMMARY

Design student working across game mechanics, level flow, and interfaces, and building them end to end. Shipped a live language-learning platform solo and a co-op puzzle game in a two-person team; now building Arties, a grant service for artists.

PROJECTS

Case studies & playable builds: jimin-byun.com

World of Words · Solo · Language-learning web platform — 2025 · world-of-words.org

- Planned, designed, and built a vocabulary platform for beginners in Japanese, French, and Spanish (to ~A2) with generated quizzes: randomized items, JLPT-style questions, and natural pairings (KO–JA, EN–FR, EN–ES).
- Reworked a typing-game format into meaning-recognition mini-games with drag/click input; tuned layouts for mobile.

Triends · Two-person team · Co-op 2D adventure (Phaser) — 2025 · GameAIfy asset contest

- Shaped the core contrast — an astronaut with tools, a plant companion with light — so progress depends on coordination.
- Designed and implemented the light-puzzle section as a three-stage learning curve: routing → splitting → coordinated play.
- Refined AI-generated sprite drafts frame by frame into readable character and plant animations.

Arties · Solo · Open-call & grant manager for artists — 2026 · in development

- Matches artists in 8 fields to open calls, showing human-verified eligibility as met / needs checking / not met (Next.js, Supabase, Claude API).
- Turned legal research into UX rules: no selection odds, and AI review that asks questions, never writes the application.

Arcade Games · Personal · Local two-player games — 2025 · Python → JavaScript

- Built one-screen, two-player games offline and tuned timing, feedback, and balance from player reactions; ported to the web.
- Ping-Pong Smash adds a timed smash for faster, riskier rallies; Space Duel grows a shape-based shooter with pickups and level-based bullet patterns.

Desktop Follower · Personal · macOS menu-bar app — 2026 · Swift

- Pixel pets follow the cursor in a line, tumble on fast flicks, and idle by personality; no system permissions needed.

LEADERSHIP & ACTIVITIES

SNU Graduation Fashion Show · Planning Team Lead · Designer

- Joined before learning garment construction; completed three original looks, then led planning, funding, and sponsorship.

SKYST Conference · Marketing Team Lead

- Led outreach for the first student-run computing conference across SNU, Yonsei, Korea University, and KAIST.

SNU Festival Planning Group (Chukjehaneun Saramdeul) · Event Team

- Designed low-budget festival games, including human curling with wheeled tubs and on-site safety planning.

School of Transdisciplinary Innovations · Student Supporters Mentor

- Mentored students in a new SNU program; founded its band club and recruited 40+ members to a live performance.

SNU Buddy · Team Leader

- Led a group of about 50 exchange students from multiple countries through the semester.

Also · SNU Computer Club, Executive Board · University Band, Violinist

EDUCATION & SERVICE

Seoul National University · B.A. Candidate · Aesthetics, Fashion & Textiles, Industrial Design — Expected 2029

Republic of Korea · Mandatory military service — Feb 2025 – Feb 2026
